

# Think how a Child Trust Fund could help

## One way to help equip your child for the future is to add even more to their Fund.

Contributions of between £10 and £1,200 can be made to the Fund every year and as all net income and gains are free from personal tax it's a great way to invest for your child's future – whatever that may hold. Please remember tax rules may change in the future.

## The monthly contributions shown could help towards...

The chart above allows for the initial £250 voucher and the additional £250 contribution when the child reaches age 7. It also assumes the regular contributions shown are paid continuously for 18 years. The area highlighted in blue shows the fund value generated by the initial £250 voucher. The figures are based on a growth rate of 7% and assume a yearly management charge of 1.5%. Please note the figures are only illustrative and not guaranteed. The actual value of the fund can go down as well as up and your child may get back less than invested.
